

The Way It Shall Be

A man was walking on the beach and tripped over an old lamp. He picked it up and rubbed it and... a genie jumped out and said:

"OK, OK, you have freed me from the lamp, blah, blah, blah!
Forget that story about the three wishes!
You got one wish and that's it, **period!**

Do you understand?"

The man sat down, thought for a minute and replied:

Yes, Genie, I Do...

Now tell me your WISH and be quick about it.

You know I am sick and tired of NOT getting the money I deserve for all the work I do...for the money I have invested since the last century and this new century...

and sick and tired of investing money in projects like the Madoff pyramid scheme and not getting my money back and never making any real money....

I work hard and my retirement is dwindling down to nothing. Like Will Rogers said, 'it is not the "return on my investment I am worried about, it is the return of my money invested.'

I have invested in MLM pyramid projects that have made a few a lot of money and the greater number of people hardly made any money at all. Mostly those that did not make any money, stopped their autoship and quit.

This is what I want. It is all based on knowing what I want. Not what someone else wants.

I want to MINE the CRYPTOCURRENCY that is helping people earn new income without any or hardly any RISK. I know there are programs out there that allow you to play games, clip coupons, take surveys, etc. and they get paid in Kala coin. This Kala coin is considered a UTILITY product, and therefore compliant with the SEC & FTC. I am aware that the Kala coin can be exchanged for Bitcoin and

then deposited into your Blockchain Wallet. I want a FREE Blockchain wallet, so I can secure my earned income from playing games, clipping coupons, taking surveys, or whatever they offer me to do.

You know like when you go to the bank and they offer you \$100 when you tell your friends about opening a new checking account. But I do not want to tell my friends right now. I just want to earn new income first and then tell my friends if I want to.

Now I also want to be able to take my Kala coins and transfer them to a mining contract program, so I can earn between 1-8% weekly on whatever I deposit into my mining contract. I want the interest to be compounded.

The cliché from Einstein was so simple. He said, “those that are poor usually pay compound interest.” “those that are wealthy usually earn compound interest.” This is extremely important. Because if I

calculate an average of 3% on \$5,000 deposited into my cryptocurrency account, then in 3 years I will have at least \$498,000.

Now for those that have little money to begin with they can deposit the minimum of \$25 and earn \$2,400 in 3 years. Now if they take the \$2,400 and deposit again in their compounded cryptocurrency mining account, then in a total of 6 years they will have over \$239,000. This will make a huge difference in the lives of families for those that have never made the money they dreamed of and their dream comes true.

Now this is important, because I am tired of losing money when I buy an MLM product and then have to sign up for autoship monthly in order to earn any commissions. I do not want to have to deal with any of the pyramid schema's.

I just want to put my Kala coin earning into a cryptocurrency mining contract that earns at least 1% and as much as 8% weekly with COMPOUND interest.

When I decide to sign friends or any one I can help earn new income, I want to be paid at least 10% on the new signed accounts. And most importantly, I do not want my commissions coming out the pocket of

the person I signed on to the mining or the social program. The commission has to be those that are direct to me in this mining contract program it should come out of the companies mining account. If any of my directs sign new people on as a Social account or Mining account, I want also a commission of 2%. This should come out of the companies account.

I will be so happy when I see that in my weekly statement, that's very rewarding with these commissions I feel I am helping myself, family and friends that I have signed into this cryptocurrency mining contract program.

And, send me a text or email to let me know how much money has been deposited into my Blockchain Wallet.

Now Genie, keep in mind, when I play games, take surveys, clip coupons, or I do other things the Social program sends to me I want to be paid in Kala coin, which I can spend when I want to, or transfer to my crypto-mining account contract.

That is not asking tooooo much, is it?

One more thing, for those that I bring into the Social and Crypto-Mining contract program, when these new accounts become active because they signed at least 3 people direct to them, I want them to get their original administrative fee of \$125 returned to them. Can you do this too?

Now what you can do Genie, is you can figure out how all this can work, and I can see all the people I sign up in the Social and Crypto-mining accounts and tell me how they are doing so I can help them through the process. You do not have to explain it to me, just create the web site so that it is as easy as spreading

peanut butter on a sandwich and eating black berry pie. It should be designed like a regular U.S. banking account for checking and savings.

It is a great day to shine your shoes!

It is a great day to buy a pair of shoes!

It is a great day for losing the blues!

It is a great day from morning to night?

It is a great day for singing a song!

Everything to gain and nothing to lose.

New income every week with compound interest.

**The genie had a good laugh and retorted:
"IMPOSSIBLE!!!"**

Just think of the website, hardware, software code, artificial intelligence, the logistics, the people needed to develop this, compliance with the banking system, federal reserve system, security and exchange commission, federal trade commission, certification, indemnification, validation, provocation, identification, the installation, the implementation, the training, the vendors to train, the secretaries, approvals from the United States Attorney General, the law firms to retain, the fees to pay people forever and forever!!! Also, we will have to get the blessing from the "Federal Limit System."

How could we put machines in every vendor shop in all major cities, think about the infrastructure and the wiring, Internet connections, the amount of invested funds, the labor...and the labor unions.

Thousands of vendors would have to make paradigm shifts from advertising to providing cryptocurrency for people to buy and sell cryptocurrency. The vendors would have to ask you to spend your cryptocurrency with them. The vendors would have to have all their merchant accounts modified for cryptocurrency from the fiat they currently have.

This would be very difficult for people and vendors because they cannot see, smell, hear, taste, or feel cryptocurrencies. This would be very difficult for the vendors and most important the governments of the industrialized nations would not be in control and they would be very unhappy.

The banks, the 189 countries in the world that control money and the so called monetary cooperation, that think they secure financial stability, that have big talks about facilitating international trade, and think they promote high employment and think they are responsible for sustainable economic growth and the biggest farce is telling people and spewing lies and

maggots out of their mouths about reducing poverty around the world.

Think about the Men of Jekyll Island, they would go absolutely berserk because they would lose control of the international monetary fund (IMF). People would be making new earnings every week and there would not be any homeless people anymore. This way toooooo much of a change for society.

No, absolutely not! NOT A CHANCE!!!

We cannot create such a CRYPTOCURRENCY earning contract program at all!

Unless you have trillions and trillions of dollars to put this uncontrolled digital currency program together all by yourself, think of another wish..."

The man understood and tried to think of a wish which could be really possible.

Finally he said:

"You know, I was married four times, and four times I got divorced. My wives always said I didn't care about them, that I was insensitive.

**My wish, therefore, is to understand women;
know how they feel inside, what they think about
when they are not talking to us ...
to know why they cry ...
to really know what they want when they say
nothing ...
to know how to make them really happy!"
But above all, eliminate the question that haunts all
men:
What are you thinking about Honey?**

The genie says :

"ALRIGHT...ALRIGHT...ALRIGHT ALREADY!"

Now when did you want that CRYPTOCURRENCY contract
Social and Mining contract program?

You will have to pay \$125 for each new member to cover
the administrative fee. Then after each new member
signs on at least 3 new directs to them, they will get \$140
added to their account in Kala coin. So, each new member
will be on the north side of the financial equation. And if
you want to mine for cryptocurrency, then each new
member will have to deposit at least \$25 in a

cryptocurrency mining contract. And we will allow them to have as many cryptocurrency mining accounts as they want.

THAT IS ALL THE MONEY THAT ANYONE WILL PAY.

No money out of your pocket goes into someone else's pocket. And you cannot be paid from any money deposited by anyone you sign as a member. That would be illegal. Remember now the company will have to be managed by the largest most respected law firm around the globe. All commissions are deposited into a cryptocurrency mining contract and the compound interest is paid out to you at the end of the mining contract.

KEEP IN MIND, YOU DO NOT HAVE TO TELL A SINGLE SOLE ABOUT YOUR CRYPTOCURRENCY SOCIAL AND MINING CONTRACTS AND YOU WILL STILL EARN NEW INCOME EVERY WEEK.

But remember, when you become wealthy, and on the NORTH side of the financial equation, it would be great KARMA, to tell those that are not as fortunate as yourself, so they too can earn a new income from your cryptocurrency social and mining contract programs.

NO AUTO SHIPS

NO MONTHLY QUALIFYING TO EARN MONEY

NO FUNNY BUSINESS

95% of the MEMBERS WILL EARN MONEY

NO INVENTORY STOCKING

Yes, I can do this, but remember the algorithm to make this happen is huge. I am going to have to design this so that it is COMPLIANT with the SEC and the FTC.

We will work on it in our office in Utah which has 26,000 square feet and 30 employees to verify everything we do.

Oh, and we will have to install a few hundred mining machines with many HVAC units to keep the mining machines cool and the workers too.

I hope you are happy with your WISH!!!

OH, you can have any member send a letter to the company and tell the administration to stop sending checks because they already have enough money.

Please sign them up in the link below.

<http://www.1lifefund.com>

Earning paid weekly with 1-8% on the contracts that are signed and active. WOW!
